Request for Proposal (RFP)

Migration from On-Premises Microsoft CRM to Microsoft Dynamics 365 Cloud

Request for Proposals released: 3/30/2026

Responses due: 4/29/2026 at 5:00pm PDT

---

1. Introduction and Background

Energy Trust of Oregon, Inc. (Energy Trust), an Oregon nonprofit corporation, is soliciting proposals from qualified vendors to plan, design, and execute the migration of our existing on-premises Microsoft CRM implementation to the Microsoft Dynamics 365 cloud CRM platform. It is Energy Trust's intention to solicit qualifications from a wide range of multiple respondents. Energy Trust will examine all responses carefully and select a single respondent to provide these services.

Energy Trust is an independent nonprofit organization selected and overseen by the Oregon Public Utility Commission (OPUC) to help Oregon utility customers save energy and generate renewable power. Energy Trust's services, cash incentives and energy solutions have helped participating customers of Portland General Electric, Pacific Power, NW Natural, Cascade Natural Gas and Avista save nearly $8.9 billion on their energy bills. The cumulative impact of the organization's leadership since 2002 has been a contributing factor in the region's low energy costs and in building a sustainable energy future. To learn more about Energy Trust please visit www.energytrust.org/about.

Our organization currently operates Microsoft Dynamics Customer Engagement 9.1 on premises (referred to as Microsoft CRM on-premises in this RFP), supporting a single business unit and mission-critical customer relationship management processes. We seek an experienced Microsoft partner to deliver a secure, scalable, and well-governed migration that modernizes our CRM capabilities while minimizing business disruption.

---

2. Description of Current CRM On-premises Implementation

- See Appendix A

3. RFP Objectives

The objectives of this RFP are to:

- Select a vendor with deep expertise in Microsoft Dynamics 365 cloud migrations
- Ensure a secure, compliant, and low-risk transition from on-premises CRM to the cloud
- Maintain current CRM capabilities while preserving required functionality and integrations
- Establish a foundation for future innovation using the suite of Microsoft CRM 365 functionality as well as related Microsoft technologies

---

4. Scope of Services

The selected vendor will be expected to provide end-to-end services covering planning, migration, validation, and post-go-live support. At a minimum, the scope of services shall include the following components.

4.1 Discovery and Assessment

The vendor shall conduct a comprehensive assessment of the existing on-premises CRM environment, including but not limited to:

- Current Microsoft CRM version, architecture, licensing, and deployment model
- Custom entities, fields, forms, workflows, plugins, and JavaScript
- Integrations with third-party systems, internal applications, and data sources
- Security model, roles, teams, and access controls
- Data volumes, data quality, and retention requirements
- Reporting, dashboards, and analytics usage
- Dependencies on legacy technologies or unsupported components
- Cost modeling based on current data volumes, usage, and user counts

Deliverables shall include an assessment report identifying risks, constraints, dependencies, cost considerations, and recommended remediation, cost efficiency and modernization actions.

4.2 Migration Strategy and Solution Design

The vendor shall define a detailed migration strategy and target-state solution design, including:

- Recommended Dynamics 365 applications and licensing (e.g., Sales, Customer Service, Marketing)
- Tenant, environment (multiple environments for development, testing, staging and production), and region strategy aligned with organizational governance
- Data migration approach (phased vs. full, historical vs. active data)

- Approach for current replication of database to a read-only database for reporting, analysis, and as a data source for an internal transaction system.
- Nightly updates to on premises data warehouse
- Customization and extension strategy leveraging out-of-the-box capabilities, Power Platform, and Azure services
- Integration architecture using supported APIs, connectors, and middleware
- Identity and access management design (e.g., Entra ID/Azure AD integration)
- Security, compliance, and data residency considerations
- Decommissioning strategy for the on-premises CRM environment

The vendor shall produce a formal solution design document for review and approval.

4.3 Configuration, Customization, and Modernization

The vendor shall partner with internal product owner to configure and extend Dynamics 365 to meet business requirements, including:

- Re-implementation or refactoring of existing customizations
- Migration from unsupported plugins or code to supported cloud patterns
- Implementation of Power Automate flows, Power Apps, and business rules as appropriate
- Configuration of security roles, teams, and field-level security
- Setup of dashboards, views, and reporting

Where feasible, the vendor is expected to contrast simplification and modernization to direct “lift-and-shift” replication of legacy functionality for the internal product team’s consideration and decision.

4.4 Data Migration

The vendor shall plan and support internal team in executing secure and accurate data migration activities, including:

- Data mapping and transformation
- Data cleansing and validation
- Migration of core and related entities
- Handling of attachments, notes, and activities
- Reconciliation and data quality verification
- Support for multiple test migrations prior to production cutover

The vendor shall create a plan to ensure data integrity, auditability, and minimal downtime during final cutover.

4.5 Integration, Migration and Validation

The vendor shall partner with internal software engineering team to migrate, redesign, or replace integrations with external systems, including:

- ERP, finance, marketing automation, and customer support systems
- Custom applications and data warehouses
- Email, document management, and collaboration tools

All integrations must comply with Microsoft-supported cloud integration patterns and security best practices.

4.6 Testing and Quality Assurance

The vendor shall partner with internal product owners to develop and execute a comprehensive testing strategy, including:

- Unit and system testing
- Integration testing
- User acceptance testing (UAT) support
- Performance and scalability testing (as applicable)
- Security and role-based access testing

Defects must be documented, prioritized, and resolved prior to production deployment. Energy Trust product owner will approve acceptable resolution of defects in collaboration with vendor.

4.7 Training and Change Management

The vendor shall support organizational adoption through co-development (with internal product owner) of the following artifacts:

- Administrator and power-user training
- End-user training materials and sessions tailored to Energy Trust's environment
- Knowledge transfer to internal IT teams
- Documentation covering configuration, integrations, and support procedures

4.8 Go-Live and Post-Implementation Support

The vendor shall provide:

- Cutover planning and execution support
- Go-live readiness assessment
- Active support period following go-live
- Transition to steady-state support and operations

---

5. Project Management and Governance

Energy Trust will provide a dedicated project manager and follow a structured project management methodology. If additional project management is proposed by the vendor, the proposal should describe:

- Project governance model
- Communication and reporting approach
- Risk and issue management approach

---

6. Vendor Qualifications

Vendors should demonstrate:

- Proven experience migrating on-premises Microsoft CRM to Dynamics 365 cloud
- Microsoft partner status and relevant certifications
- Experience with organizations of similar size and complexity
- References from comparable projects

---

7. Proposal Submission Requirements

Responses must be submitted via email. A maximum length of 15 pages (does not include required Representations and Signature page or cover letter) will be accepted.

You must disclose any direct or indirect, actual or potential **conflicts of interest** with Energy Trust.

Include a signed and completed **Representations and Signature page**, in the form attached to this RFQ as Appendix B, certifying the representations stated therein (outside the 15-page limit).

Proposals must include:

- Cover letter describing your company's background and proficiency
- Executive summary

- Detailed approach and methodology
- Scope assumptions and exclusions
- Project timeline and resource plan
- Pricing and licensing assumptions
- Risk identification and mitigation strategies

8. RFP Schedule

Scheduled Activity	Date
Energy Trust issues Request for Proposals	3/30/2026
Deadline for respondent questions and requests for additional information (via email only, to kevin.hoffmann@energytrust.org). All questions and answers will be posted at About: Contracting Opportunities - Energy Trust of Oregon.	4/15/2026
RFP responses due by 5:00 p.m. PDT	4/29/2026
Interviews/reference checks with top respondents (if held)	5/18 – 5/29/2026
Energy Trust selection team enters into contracting with successful responder	6/8/2026

9. Selection Criteria

Response selection will be the sole responsibility of Energy Trust and will be undertaken at the sole discretion of Energy Trust. Responses may be eliminated from consideration at Energy Trust's sole discretion for any reason, including but not limited to:

- The response is substantially incomplete or exceeds page limits
- The response does not address the objectives and requirements of this RFP
- Response is inconsistent with Energy Trust policies or requirements
- A conflict of interest exists that cannot be mitigated

Responses will be evaluated by the following criteria:

- Quality of Response - Clarity and completeness
- Capabilities - Demonstrated capability to provide the services sought
- Pricing – Competitiveness and clarity

Energy Trust also reserves the right to change the criteria used to evaluate responses.

Responding companies may inquire about the status of their response via email (kevin.hoffmann@energytrust.org). Specifically, they may inquire about the receipt and

condition of response materials and receive an update as to whether their responses are still under consideration. All responding companies will receive notification when a contractor has been selected.

---

10. Terms and Conditions

Energy Trust reserves the right, in its sole discretion, to reject any or all responses in whole or in part, to waive any minor irregularities or informalities in a response, and to enter into any agreement deemed to be in its best interests. In addition to any other enumerated reserved rights and/or options as stated in this RFP, Energy Trust may in its sole discretion do any one or more of the following:

- Determine which responses are eligible for consideration in response to this RFP.
- Disqualify responses that do not meet the requirements.
- Negotiate with respondents to amend any response.
- Select and negotiate and/or enter into agreements with respondents who are most responsive to the RFP and whose responses best satisfy the interests of Energy Trust and not necessarily on the basis of price alone or any other single factor.
- Issue additional subsequent solicitations for responses, including withdrawing this RFP at any time and/or issuing a new RFP that would supersede and replace this one.
- Vary any timetable or schedule, add or change any provisions discussed herein.
- Conduct any briefing session or further RFP process on any terms and conditions.
- Suspend or modify the RFP process at any time.
- Enter into relationships with more than one respondent.

10.1 Confidentiality

Respondents shall clearly identify only those portions of their proposals that they do not want revealed to third parties and label such portions as “Confidential Information”. Except as required under law or for regulatory purposes Energy Trust will maintain confidentiality of such information. Energy Trust will not accept proposals or other documents that are marked to indicate the entire document is the confidential or proprietary information of the sender or that restricted handling is required. Normal business practices will be observed in handling proposal materials. Except in the case of litigation or other legal disclosure and/or audit requirements, Energy Trust will not disclose information submitted in response to an RFP to any third party.

10.2 No Commitment/Resulting Contract

This RFP does not constitute an offer by Energy Trust, nor does it commit Energy Trust to enter into a contract or similar undertaking with any of the respondents or any organization associated with any of the respondents. Energy Trust reserves the right to enter into relationships with more than one respondent. Energy Trust also reserves the right to suspend or modify the RFP process or to issue a new RFP for the services described that would supersede and replace this one. No binding obligation shall be created unless Energy Trust or its representative and the concerned parties execute a binding agreement.

Final selection implies that Energy Trust and the selected respondent expect to reach a contractual agreement which would outline the roles and responsibilities of all parties. No award will be considered a commitment until a written contract has been executed by Energy Trust with the selected respondent(s). The contract term cannot exceed two years.

10.3 No Reassignment

All responses shall state that in the event of an award from Energy Trust, the resulting contract(s) and obligations shall not be sold or reassigned without the written permission of Energy Trust.

10.4 Conflict of Interest Disclosure

Respondents shall disclose in their response all direct or indirect, actual or potential conflicts of interest it or any of their personnel may have with Energy Trust. A "direct or indirect conflict" is defined as any situation in which an individual has or may be reasonably construed to have a direct or indirect personal or financial interest in any business affairs of Energy Trust, whether because of a proposed contract or transaction to which Energy Trust may be a party or may be interested or is under consideration, or whether such conflict is purely conceptual, because of similarity of business interests or affairs. If such conflict of interest does or may exist at the time respondents submit their proposal, respondents must include a conflict of interest mitigation strategy in their proposal.

10.5 Validity and Deadlines

All responses shall specify the date through which the response is valid. At a minimum, responses shall be valid through 8/31/2026.

10.6 Waiver of Claims and Response Costs

The candidate waives any right it may have to bring any claim, whether in damages or equity, against Energy Trust, its Board, agents, employees or contractors, with respect to any matter arising out of any process associated with this RFP. This RFP does not obligate Energy Trust to pay any costs incurred by any respondent in the preparation or submission of a response. Once submitted, responses will not be returned to respondents.

10.7 RFP Clarification/Interpretation

Any clarification or interpretation of the RFP documents shall be issued in writing by Energy Trust. Oral instructions or information concerning the RFP given out by Energy Trust employees or agents to prospective respondents shall not bind Energy Trust.

10.8 Additional Information

Energy Trust may request additional information prior to final selection.

APPENDIX A

Current Implementation Details

Current Implementation

1. Version running: Dynamics Customer Engagement 9.1.37.6
2. Version history: originally implemented 2011.
3. Upgraded to 2013, 2016, 8.0, 8.1, 8.2, 9.1
4. Application Server: Windows 2019 Standard
5. Database SQL Server: Microsoft SQL Server 2019
6. Five Environments (each on a separate virtual machine)
    - Production
    - Staging 2
    - Staging
    - Test
    - Development
7. Users: 451 total
    - 273 Basic/Team level licenses (including 3 service accounts)
    - 178 Full / Customer Service or Sales licenses (including 9 service accounts)
8. Database (Production) current Size: 1,027,478 MB
    - *Note: Attachments could be moved out of CRM before migration saving 730,082 MB*

Organization use of Dynamics Customer Engagement (CRM)

Energy Trust serves Utility customers in Oregon and Southwest Washington. We distribute funds to individuals and organizations implementing clean energy and energy efficiency measures. We work with Stakeholders and Community Business Owners key to aid in successful delivery of value to our customers. We have highly customized our CRM application to handle our work.

In CRM, key tables and functionality we use:

1. Accounts - Customers, Stakeholders, Partners, Trade Ally tracking
2. Activities - Correspondence with Customers, Stakeholders, Partners
3. Cases - Support for Customers applying for incentives
4. Contacts - Includes utility customers, Stakeholders, Partners, Trade Allies
5. Opportunities - tracking state, federal, and private funding opportunities
6. “Sites” (custom table) - Locations where energy efficiency or clean energy measures can be implemented
7. Queues - Intake email for customer service, outreach, studies and more
8. Documents - Attached documents for Accounts, “Sites”, etc. stored in SharePoint Online

Customization counts

- Custom tables - 30-33 (we may be making 3 into multi-select picklists)
- Web resources - 64, plus icons

Processes

- Business Rules - 44
- Dialogs - 13 (to be replaced with Power Automate Flows)
- Workflows - 75
- Custom plug-ins - 2

Custom Reports

- SSRS - 3
- Power BI - 2

Standard Organization reports reference CRM Production data replicated to a separate reporting server. Data is refreshed instantaneously.

Integrations

Our Dynamics Customer Engagement instance integrates with other On-premises SQL databases, online applications, webforms

1. Ally Address - Script runs hourly to update Latitude and Longitude on Office type Customer Address records of Trade Ally Accounts via hourly scheduled PowerShell job. The script updates the latitude & longitude fields on Customer Address record.

2. CCB - Website (https://ccb.state.or.us/search/) scraped monthly via scheduled PowerShell job updates Contractor license status (1 field) on Account records in CRM
3. Contact Service Creates contact records in CRM from web form input
4. ETO_DW - Data Warehouse: nightly jobs refresh the warehouse with select data from our various on-premises SQL databases
5. Exchange Online - Integration with 49 CRM Queues via Dynamics 365 Hybrid Connector. The integration relies on Exchange Web Services (EWS) which is being removed from Exchange Online in Oct. 2026
6. Find a Contractor - External-facing webform used by customers. References CRM data to provide search results.
7. MS Great Plains Financials version 18.7 - Weekly scheduled job updates 9 CRM fields on Contact and Account records -could be replaced with Virtual entity in CRM "Vendor"
8. Import Web form - import of Incentive application data designed and maintained by external web development company, OMBU.
9. Power BI - CRM Data queried for power users to build reports
10. PowerClerk - Online platform pulls data from CRM database and PT database via API, and creates Contact records in CRM
11. Project Tracking (PT) - iframe displays sub grid of 13 columns of data on-premises SQL database for in-house built application tracking projects and payments.
12. SharePoint Online - Integrates with CRM via Azure (Entra ID) app registration
13. SiteGeo - An API is used to verify and normalize Customer Addresses via Smarty Streets and Google
14. SmartConnect Integration platform automates bulk updates to CRM database (6 weekly, 10 Daily, and 20 Ad-hoc integrations
15. Supplier Diversity - Stored procedure runs nightly to pull CRM Account data into a separate on-premises SQL database tracking contractors.
16. Trade Ally Enrollment - External-facing webform used by customers. API connects to CRM where Account records and other custom table records are created upon webform submissions from TAE.
17. Utility Customer Information (UCI) - iframe displays 7 columns of data from separate SQL on-premises database.
18. UCI - Customer Data imported from utility providers on meters, utility accounts, addresses, stored in separate on-premises SQL database.

APPENDIX B

REPRESENTATIONS AND SIGNATURE PAGE

I, the undersigned declare that;

1. I am an authorized agent of the respondent and have authority to submit this request on behalf of the respondent.
2. The information provided in this response is true and correct to the best of my knowledge.
3. I have read this Request for Qualifications in its entirety and agree unconditionally to all of its conditions and requirements.
4. The respondent has not directly or indirectly induced or solicited any other respondent to submit a false or sham response.
5. The respondent has not solicited or induced any other person, firm or corporation to refrain from proposing.
6. The respondent has not sought by collusion to obtain for itself any advantage over any other respondent or Energy Trust.
7. The respondent's response is genuine; not made in the interest of, or on behalf of, any undisclosed person, firm or corporation; and is not submitted in conformity with an agreement of rules of any group, association, organization or corporation.
8. I understand and accept that the approval or rejection of respondent's response is within the sole discretion of Energy Trust and that there is no legal commitment until all due diligence has been performed and a properly authorized contract has been duly and properly executed.
9. I authorize the representatives of Energy Trust to investigate the business history of the respondents, its affiliates, and all associated partners, principals and management and authorize the release of all said information.
10. I agree that I will report immediately in writing to Energy Trust any changes to the information contained herein at any time while respondent's response is under consideration.

The information contained in this response and any part thereof, including its exhibits, schedules and other documents and instruments delivered or to be delivered to Energy Trust, is true, accurate and complete. This response includes all information necessary to ensure that the statements therein do not in whole or in part mislead Energy Trust as to any material fact.
